# 2D while loops

```
void a(void) {
    int row = 0;
    while (row < SIZE) {
        int col = 0;
        while (col < SIZE) {
            if (row == col) {
                printf("O");
            } else {
                printf("X");
            }
            col++;
        }
        row++;
        printf("\n");
    }
}
```

```
void c(void) {
    int row = 0;
    while (row < SIZE) {
        int col = 0;
        while (col < SIZE) {
            if (col != 1 && row != 1) {
                printf("O");
            } else {
                printf("X");
            }
            col++;
        }
        row++;
        printf("\n");
    }
}
```

```
void b(void) {
    int row = 0;
    while (row < SIZE) {
        int col = 0;
        while (col < SIZE) {
            if (col % 2 == 0) {
                printf("O");
            } else {
                printf("X");
            }
            col++;
        }
        row++;
        printf("\n");
    }
}
```

```
void d(void) {
    int row = 0;
    while (row < SIZE) {
        printf("X");
        int col = 1;
        while (col < 3) {
            if (row == 0 || row == 3) {
                printf("X");
            } else {
                printf("O");
            }
            col++;
        }
        printf("X");
        row++;
        printf("\n");
    }
}

# enums and structs

- parts of struct
- initialise (x2)
- access/change fields
- parts of enum
- enum variables
- enum as struct field

# variable names

In your groups come up with at least 5 variable names of which some are:

- valid
- invalid
- bad style
- good style
